Introduction

Ways to work with Azure Cognitive Services

- Predefined data and model
- Custom data and model

Where to go next?

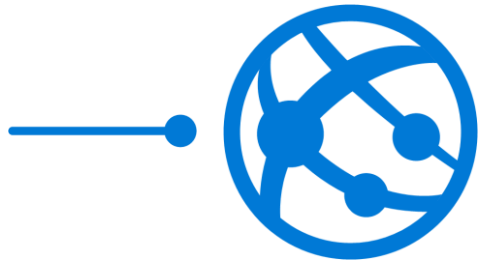
Working with the Azure Cognitive Services

Different Ways to Work with Cognitive Services

Create service in Azure Portal

(only for custom services)

Customize and train model in service portal



Call services from your application

Demo

Predefined data and model

Computer Vision API

Demo

Custom data and model

Language Understanding API

Summary & Where to Go Next?

Working with Azure Cognitive Services

- Easy to provision
- Predefined data and model has limits
- Custom data in service portals

Where to go next?

- Pluralsight courses on specific APIs
- Microsoft docs
- Microsoft API reference
- Try Azure Cognitive Services and more:
