Introduction

Explaining hyped-up terms

What Machine Learning is

Azure Cognitive Services

- What they are
- What problems they can solve for you

The Difference Between AI, ML, DL, and ANN

The Buzzwords

The Buzzwords

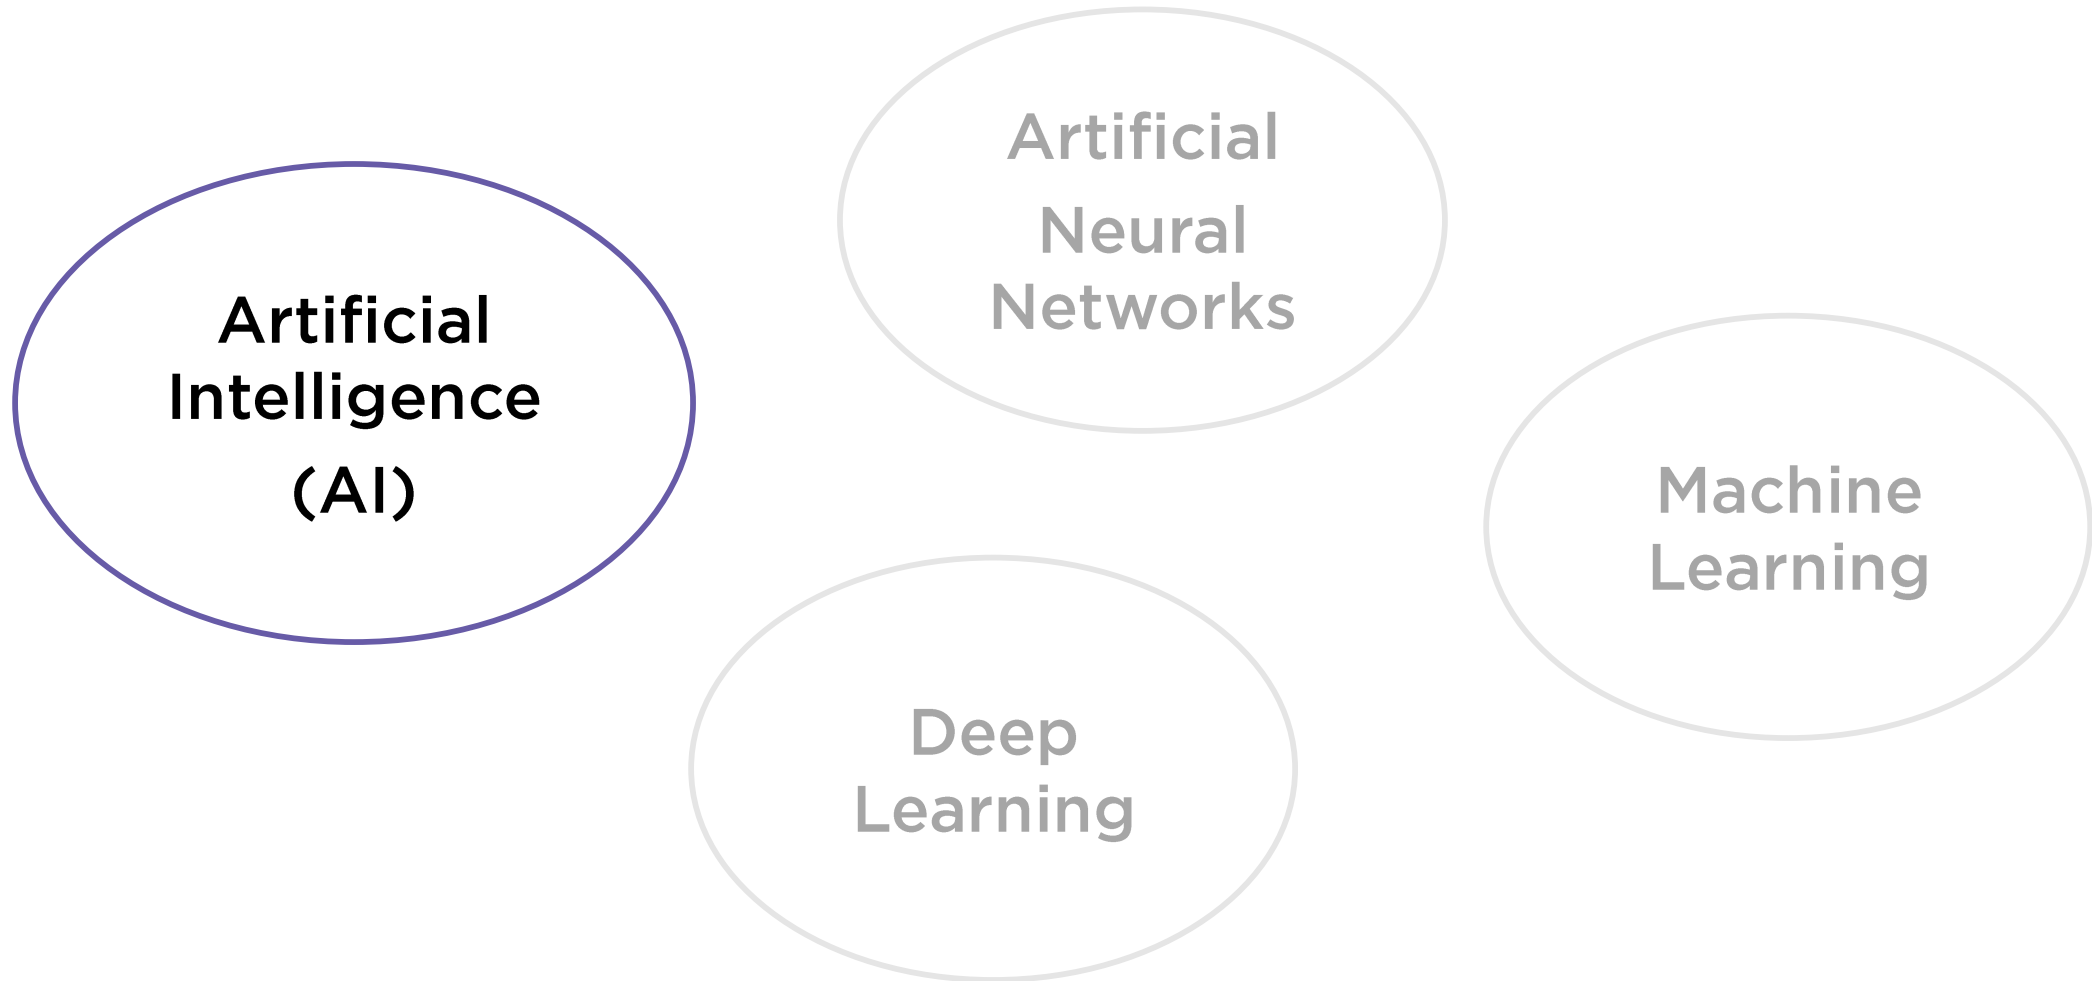

“AI involves machines that
can perform tasks that are
characteristic of human
intelligence”

John McCarthy, 1956

The Buzzwords

The Buzzwords

“Machine learning is a field of computer science that gives computers the ability to learn without being explicitly programmed”

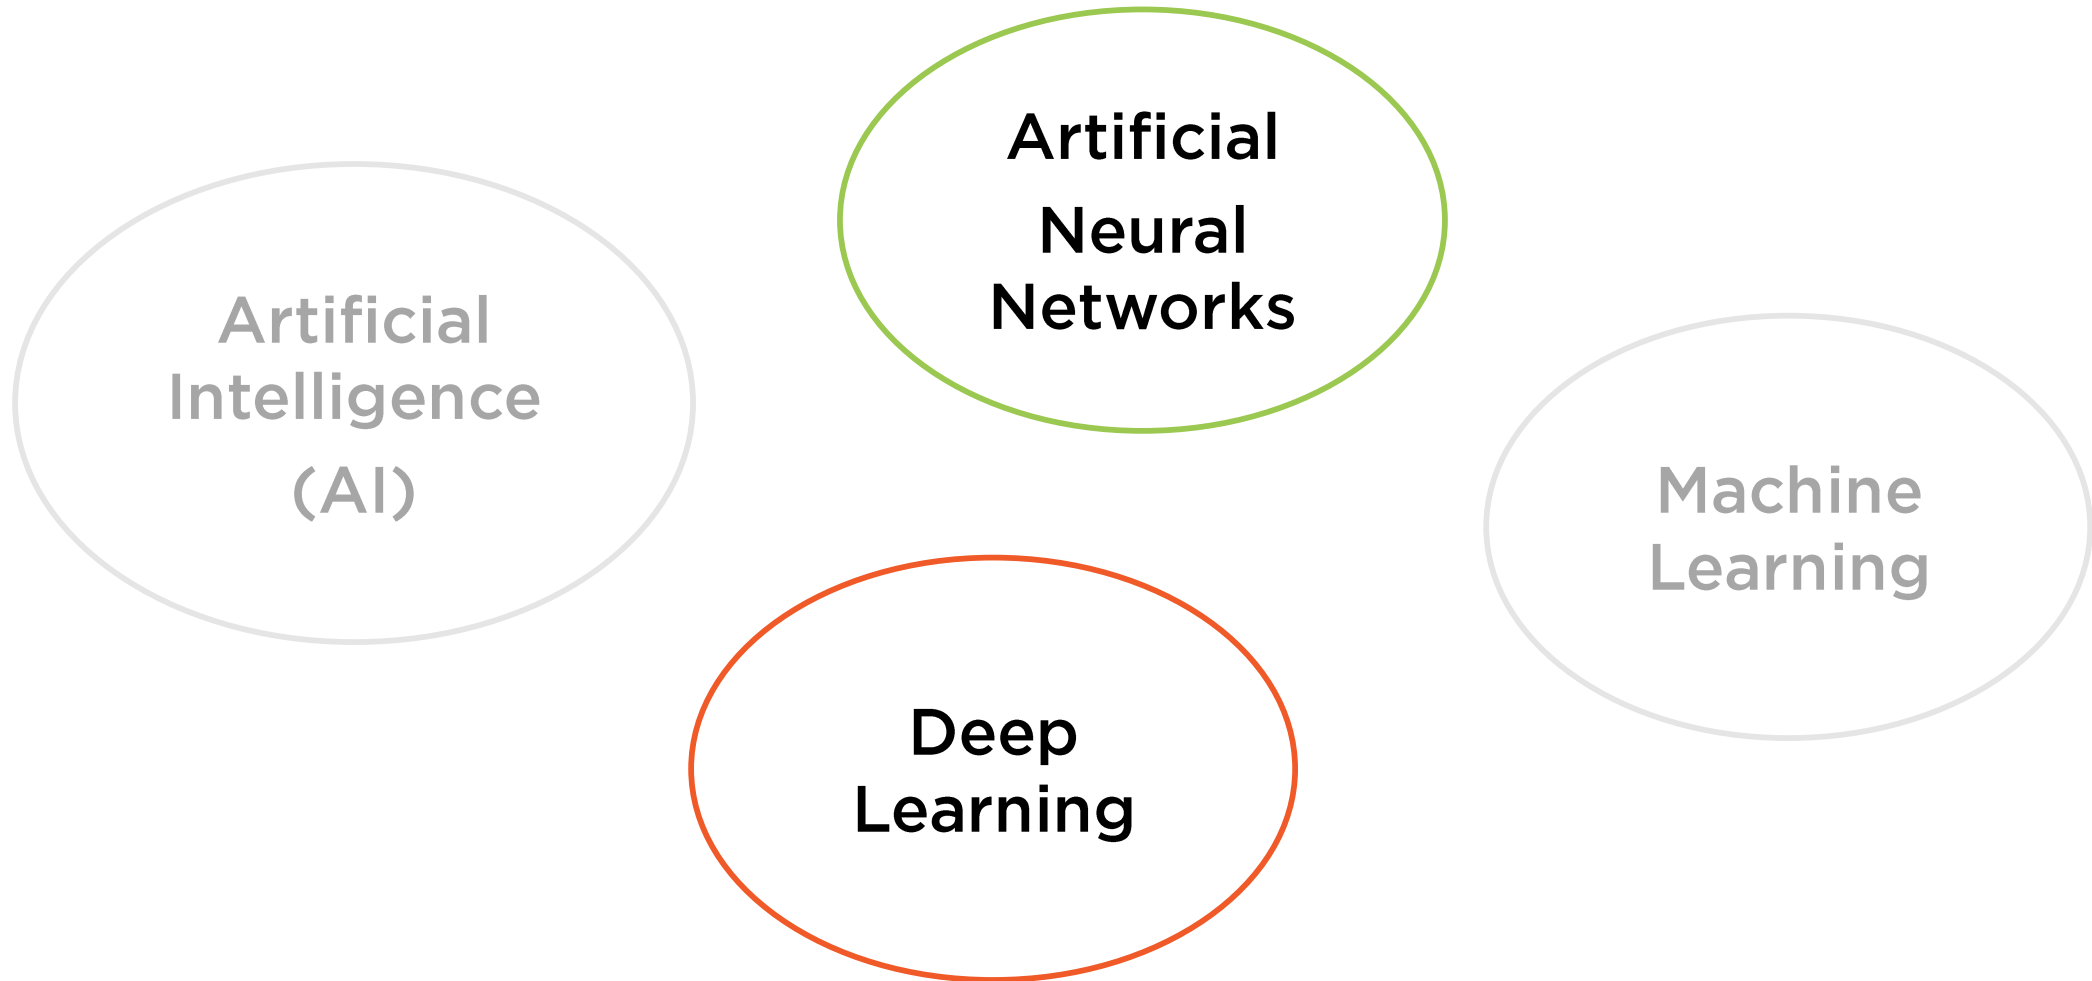

Arthur Samuel, 1959

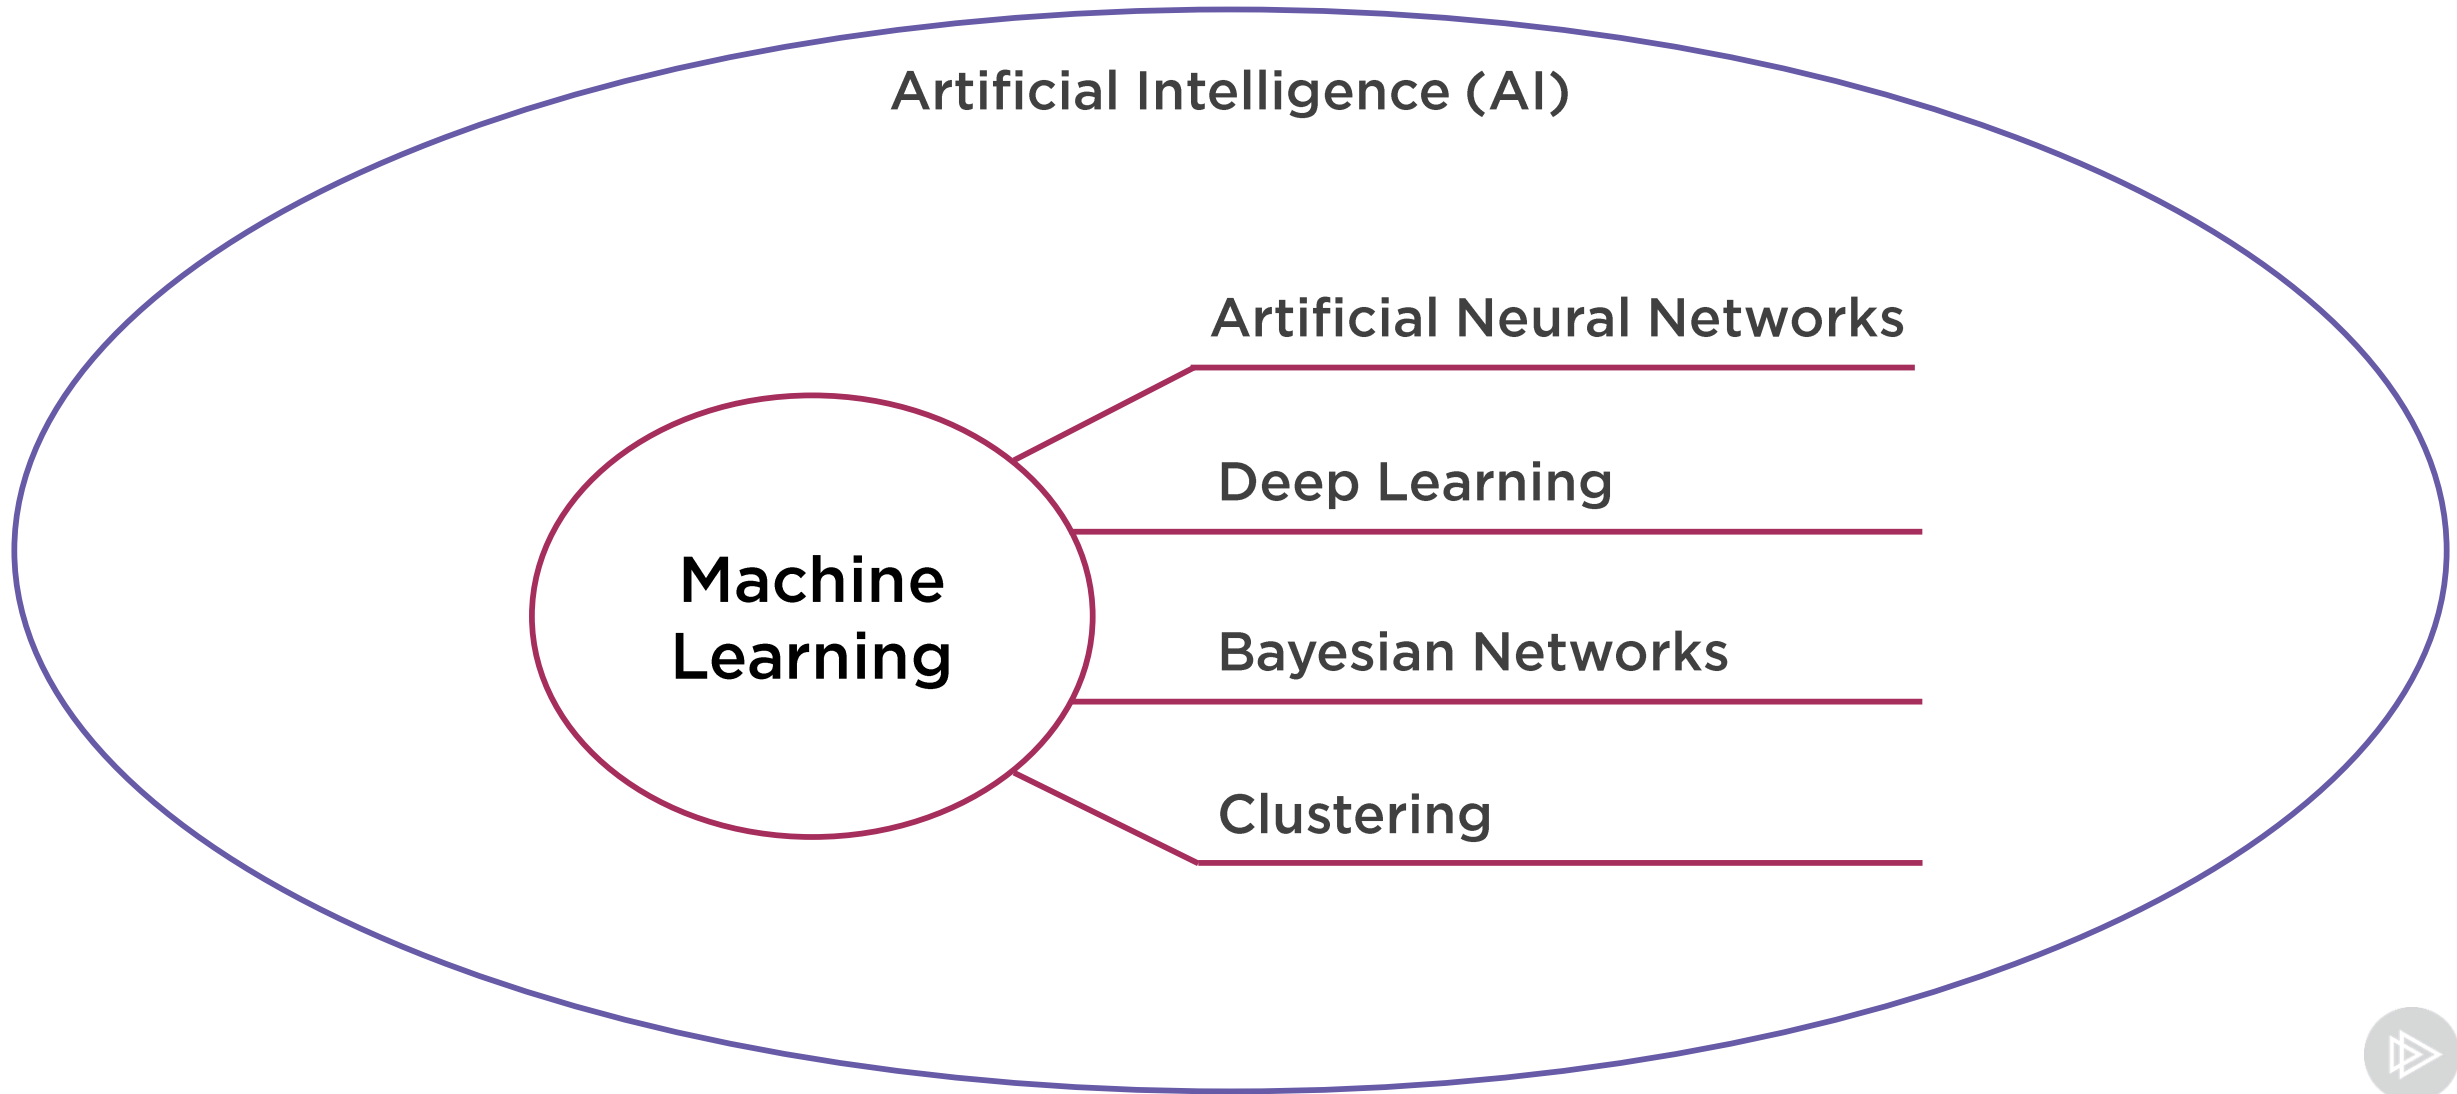

The Buzzwords

The Buzzwords

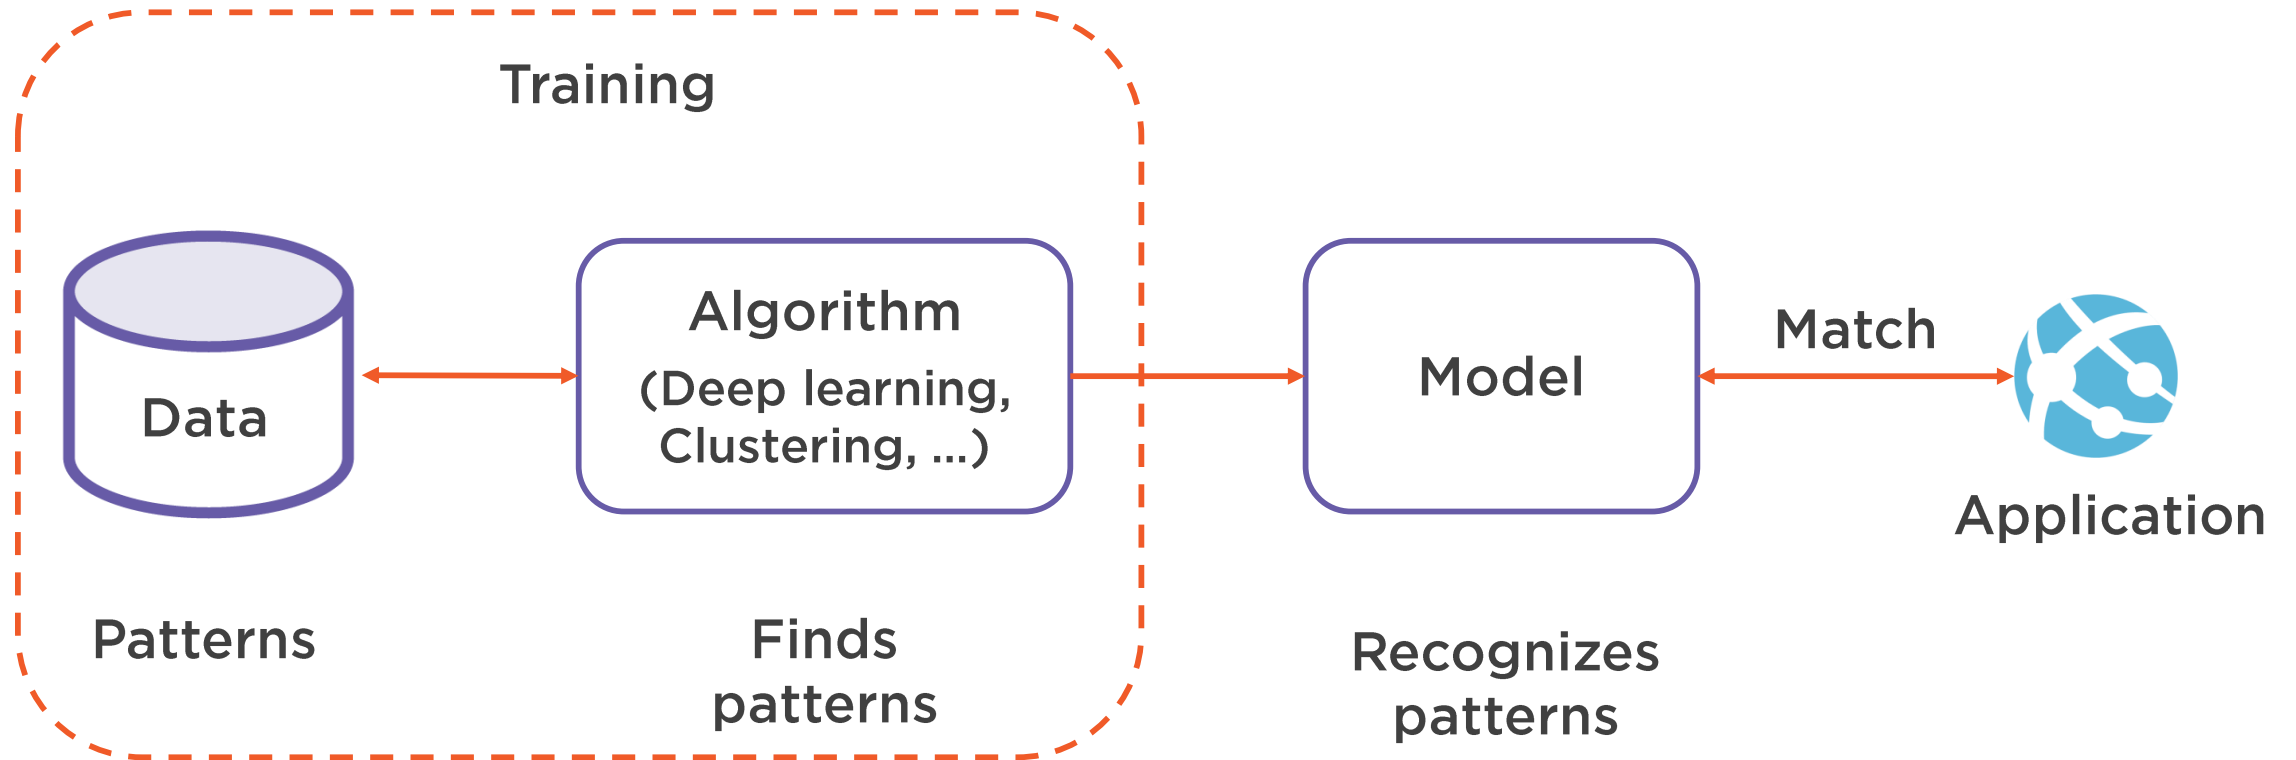

How It All Fits Together

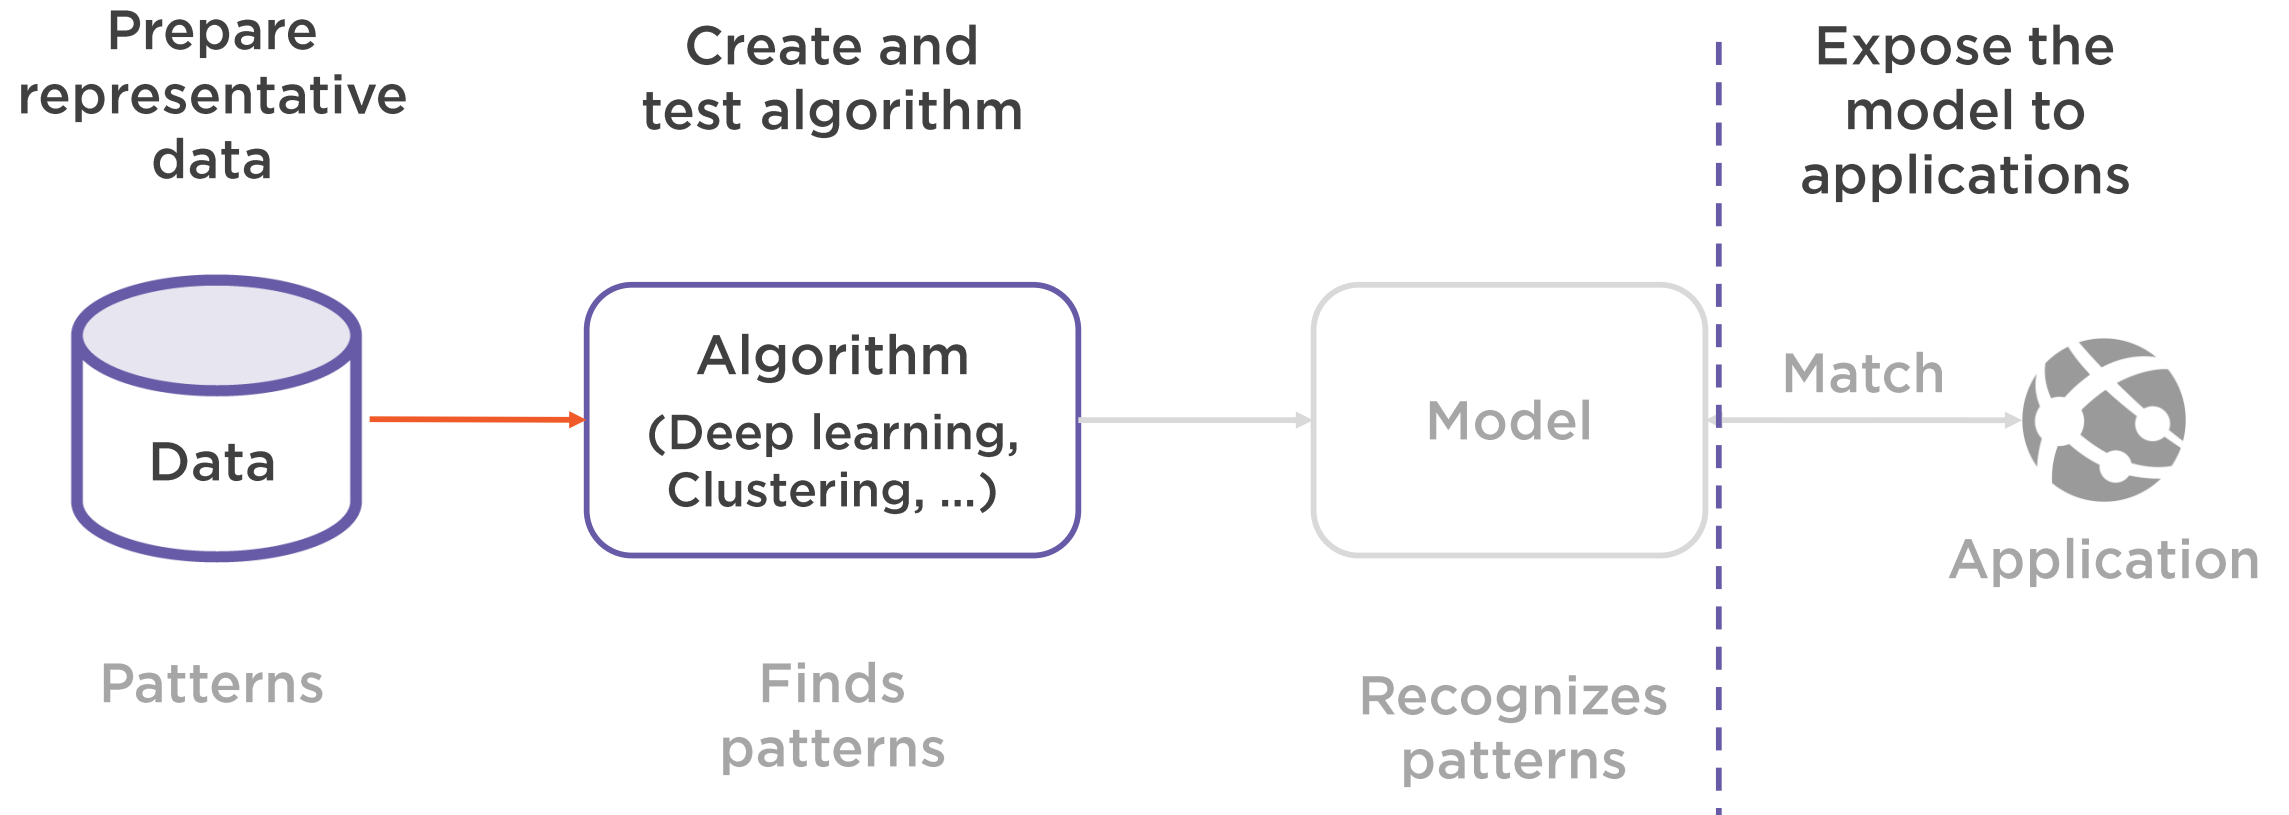

How Machine Learning Works

The Overview of Machine Learning

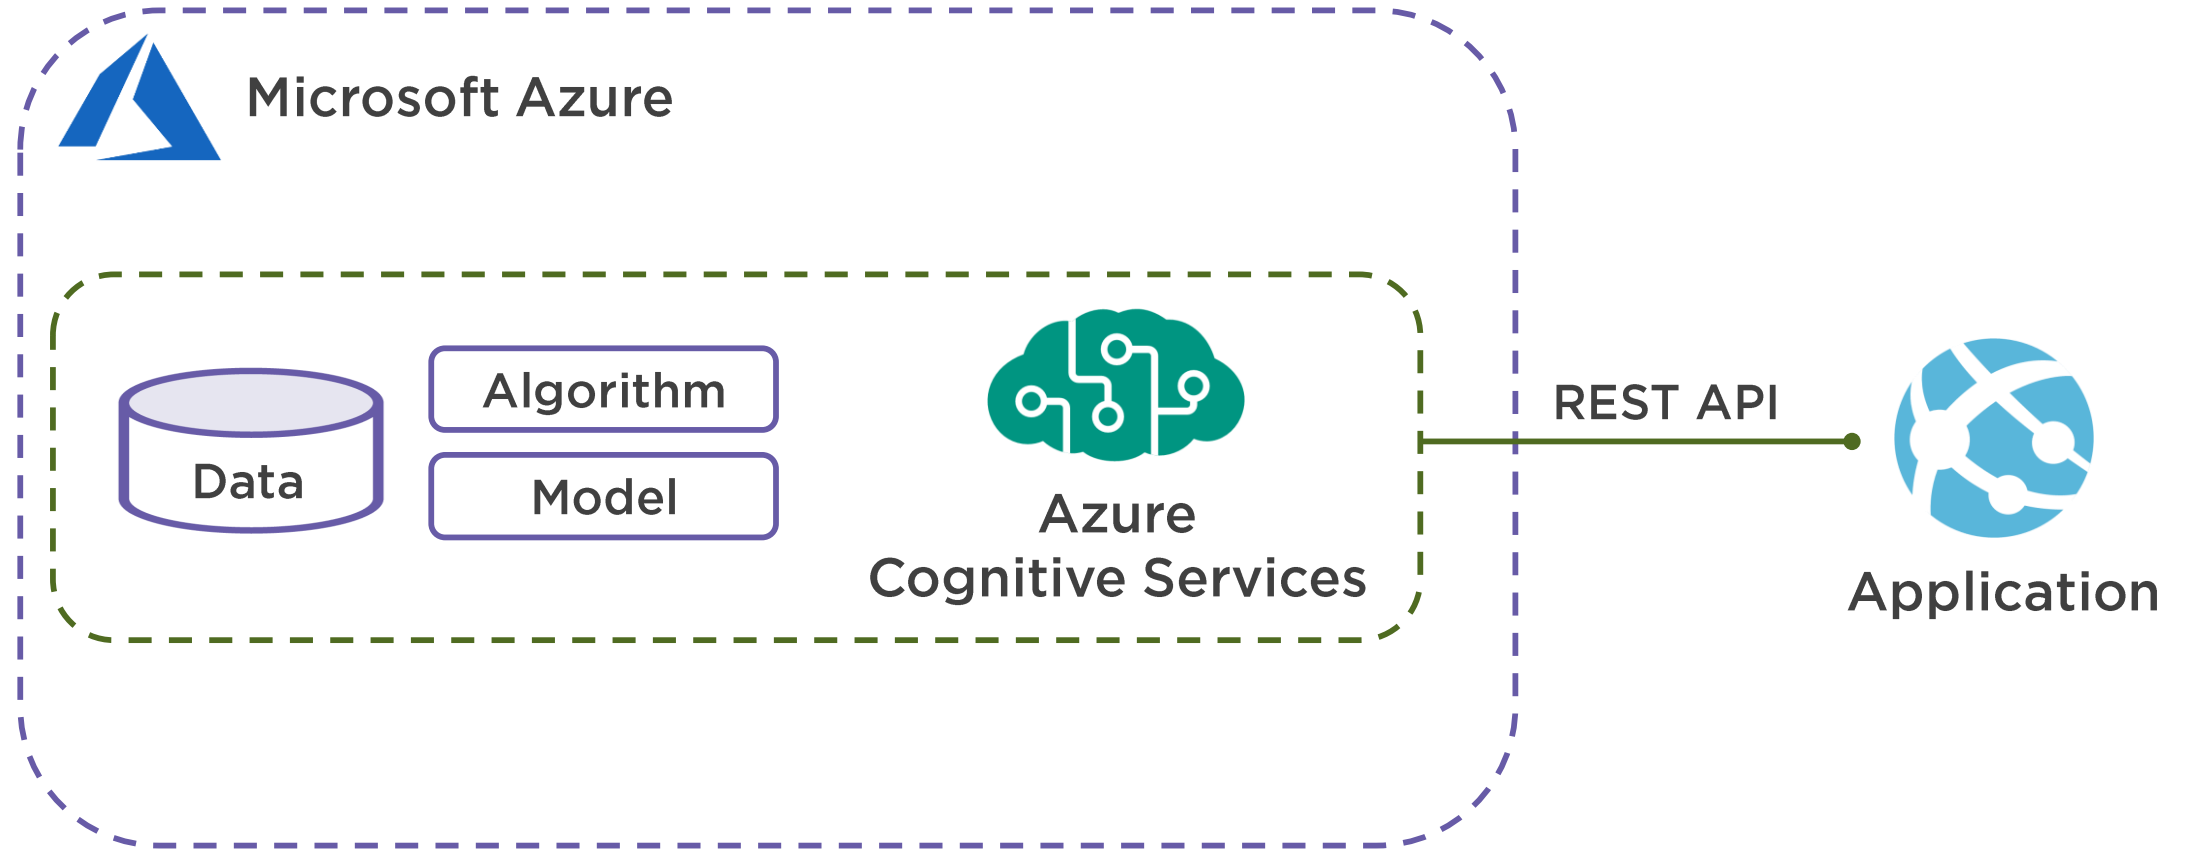

The Hard Parts of Machine Learning

Leveraging Cognitive Services to Use Machine Learning

Cognitive Services Make Things Easy

Advantages of Using Cognitive Services

Data preparation is
done by Microsoft

Algorithm-as-a-Service

Easy consumption

Performance
Availability
Security

When Are Cognitive Services Not for You?

Custom data and
algorithm

Things to Remember

Artificial Intelligence

- Machine Learning
 - Deep Learning
 - Artificial Neural Networks
 - ...

Machine Learning

- Data
 - Contains patterns
- Machine Learning Algorithm
 - Finds patterns
- Model
 - Recognizes patterns

Azure Cognitive Services

- Pattern recognition-as-a-Service
